## Unlocking Trucks

After you earn a certain amount of total stars, a new truck is unlocked. The total number of stars you currently have isn't listed anywhere in the game, so you'll have to keep track of it yourself.

The new trucks that are unlocked with Super Excite Mode are a little different: if you have earned past the number of stars required to unlock the Dynamo, then the first SE mode truck (Dynamo) is unlocked after earning 500 more stars, then every subsequent truck is unlocked after the difference between that truck and the next truck is earned. Example: the Mongoose is unlocked after you earn 1000 stars after unlocking the Dynamo, regardless of your over-all star count.

| Unlockable | How to Unlock   |
|------------|---|
| Alpine     | 2500 Stars  |
| Blaster    | 1000 Stars after Mongoose   |
| Dominator  | 5000 Stars  |
| Dynamo     | 8000 Stars. If your total exceeds 8000 once Super Excite mode is unlocked, you must earn 500 more stars to unlock it. |
| Kodiac     | 1000 Stars after Trekker  |
| Mako       | 1000 Stars after Blaster  |
| Mongoose   | 1000 Stars after Dynamo   |

### Unlockables

#### EX Characters

Unlocking EX versions of the characters (basically the same character with a different move set) can be done through survival mode. Every twenty levels you'll face the EX Shadow version of a certain character, and defeating them unlocks it for your own use.

#### ----- Gold/Shadow Characters

Like EX characters, they can be unlocked through survival mode. Once you've gotten to a high enough level in survival, you'll start facing the gold forms of each character (every twenty levels). Defeat them to unlock them for your own use. The other way to unlock them, is via time release.

To select a Shadow character, press Zr (Classic Controller. Whatever button you use to change the color scheme) until reload appears below the character. Then press Dust. To select a gold character, press Zr until Slash appears below the character, and once again, press Dust.

#### Easily Raise Shelly's Heart Level

Every time you speak to Shelly and request a rucksack upgrade, Shelly gains heart points - even if you don't have the items to create the upgrade. To easily get Shelly to 10 hearts, request the rucksack upgrade over and over when you don't have the necessary materials with you. This is useful because the amount of money you make working part-time at the Tailor Shop is based solely on Shelly's heart level; therefore, if you raise her heart level this way, you can easily make a lot more money in your part-time Tailor Shop work.

### Secrets

#### Secret alternative third areas

While playing a "Target Shooting" level, keep on the lookout for scarecrows. Once one is found, shoot the torso of the scarecrow 8 times. The head will inflate, allowing you to shoot it for 1000 points. Do this with the two scarecrows in the level (the second one will only appear if the first has already been shot), and instead of taking you to the default third area, the game will bring you to an alternative area, with more gold targets.

## Golden Wii Wheel

Use the wii wheel extensively in all the modes, when you go online a golden wii wheel will be next to your name.

## Have a star by your nickname

Playing extraordinarily well in Grand Prix races can produce a Star Ranking upto 3 at the end results instead of the standard "C, B or A."

Collecting these stars in all Grand Prix's adds a Star Icon next to your name in WiFi Races and on the Results Screen for your opponents to see.

(Note: Say, if you get a Three star rating in every Grand Prix except one which you got a One star

rating in. You would get a One starred nickname until you manage to upgrade the rank.)

## Glitches

### More than one person can be the same character.

First, make P1 choose the character you both want to be. Then unselect the character and move off of it. Move P2 over, and select the character. Go back one screen, then go into the character select again. You should both be on the same character. Both of you select the character. Do whatever you want from there on.

Note: In the character select screen and options, whenever one of you does an animation, both of you will. Also, if P2 chooses a different kind of vehicle than P1, P1 will look strange. Don't worry, this won't actually happen in the game.

I haven't tested this with P3 or P4 yet, but in theory, it should work.

## Secrets

### Boost when recovering from a fall

When you fall into something, such as water or falling from rainbow road, when you land, if you hit 2 at the moment you hit the ground, you get a temporary boost.

-----

### Change Mii Racer weight class

Go into the Mii Channel and change your Mii drivers weight, which will have an in game impact causing you to change weight class and have different cars.

-----

### POW Block Immunity

When you see the POW block on your screen and its about to hit you, just do the function you would normally use for a trick to create a shockwave for yourself to become immune to the spin out the POW block creates (Control panel on GCN controller, Shaking Wii wheel, etc.). This can be done on both bikes and carts. Even though you don't loose speed or spin out, you still will loose the items you were carrying.

-----

## Quick Start

When the countdown starts wait till the 2 starts to disappear and then press and hold the 2 button. So the 2 must still be visible but disappearing. This will give you a boost at the start of the race.

A wallpaper is a background graphic for the OMP and shop menu's. Once you have more than one wallpaper, you can change between them by going to 'Settings' under the 'Other' menu in the OMP. Most are easy to find, while others are very rare.

To obtain wallpaper 10:

- 1) Make your way to Intelligent Sea and go to Bravo. Take the Residential elevator up one level (6F) and enter door 1 (left of the shop) and you'll meet a guy named Kamaro. Talk to him to become friends. He'll tell you about the Shouprieme flower.
- 2) The left entrance at Rock Castle leads to the Sky Cave. Exit the top left and you'll be on a scenic bridge. The next cave to your left will be Rock Castle Spirit Altar. Go to the left and make the first right turn and before you turn left again, you'll see a very large (very out of place) blue flower called a 'Shouprieme'. [Here is what it looks like, and here is where it is.] Press the action button to grab it.
- 3) Go back to Kamaro's room at Bravo Residential 6F Room 1. Talk with him a few times, and he'll notice you have the Shouprieme. If you give it to him when he asks for it, he'll give you this wallpaper in return.

A wallpaper is a background graphic for the OMP and shop menu's. Once you have more than one wallpaper, you can change between them by going to 'Settings' under the 'Other' menu in the OMP. Most are easy to find, while others are very rare.

Obtaining this wallpaper requires a lot of work. This is definitely the most difficult to get in the game.

When you arrive at Artiela, you'll receive an Artbook that logs every piece of art you can see in the world. If you fill it up, you'll notice that there are 3 missing pieces. (Note: you do not have to see every piece to obtain this wallpaper.) Each of those three missing art pieces are made up of multiple parts. You have to collect those parts and donate them to the Artiela Museum by talking with the lady at the purple desk. When completed, they will be viewable at the 3F Gallery level. After you turn in all three sets, you'll get your wallpaper.

### K.K. Slider Concert

If you play any kind of Brawl on the "Smashville" Animal Crossing stage when your Wii's internal clock is set to a Saturday between the hours of 8:00 PM and midnight, K.K. "Totakeke" Slider will

appear in the background of the stage and serenade your brawl.

## Secrets

### Easy CD and Sticker Drops

First, acquire Stage Builder Parts Set B (Make 5 custom stages). Make a level where there are conveyor belts running into a wall, and a platform somewhere in the level that a player can stand on and stay there.

Plug in a second controller. Go into options, and set every item EXCEPT Sandbag off. Set items to high. Go into your conveyor-belt-level in a regular Brawl and have the second character jump and stay on the platform, so it's not in the way.

Now, when the Sandbags fall, they'll stay at the wall. Use your character (Kirby's basic A attack, repeatedly, recommended or another character that can hit many times quickly.) to hit the Sandbags over and over. Since all other items are turned off, only stickers and CDs will appear. This is the easiest way to get a lot of CDs/Stickers quickly.

### Fight Crazy Hand in Classic Mode

To fight Crazy Hand in Classic, you must reach the Master Hand in under nine minutes and without using any continues. Also, it must be completed on Hard mode or higher. If these conditions are met, Crazy Hand will appear alongside Master Hand at the start of the match.

### Selecting Zero Suit Samus

Gamecube/Classic controller: Hold the R button

You can then release B and within seconds, the Cheat Gnome will appear in front of your house near the sidewalk. You can then select him repeatedly for 10,000 (actually 9,999) Simoleons each time!

You can then go to grab mode and place him in the inventory, if desired. No effect, just for fun.

### Glitches

#### Giant Mouser boss glitch

The Giant Mouser at the end of level 4 can be beaten even more easily than normal with this trick. Just stand under him and wait for his mouth to open. When his mouth opens to reveal the "weak spot", pause the game. Unpause the game, and the Mouser's mouth will be closed again, but his weak spot will be slightly visible from behind his mouth. You can now hit it to cause damage while his mouth is closed! Repeat this every time he opens his mouth for an easy victory.

### Secrets

## Easy way to restore power

Find a doorway that has a pizza slice or full pizza right at the beginning. Enter, grab the pizza, and exit. If you go back in the pizza will regenerate. Use this to restore power to all your turtles.

## Remove Crushers in Level 3

Go to the third level and hop in the Party Wagon. Whenever you see a pesky Crusher drive around, press SELECT. You will exit the car, and the Crusher should vanish from the screen.

## Share Boomerangs

When you get the boomerangs, throw up to 3 of them in the air, then switch turtles, and have the new turtle catch them. The new turtle will be able to use those boomerangs without having picked up a boomerang icon.

## Glitches

### Knock down other players pins in bowling

(This is best done on 2 player mode but I hear its possible by yourself)

In bowling, if you aim your arrow to the very end of the lane, then move your character to the end aswell, you can throw the ball onto the other players lane, most likly it will go in their gutter, but if your talented enough, you can get it to knock down their pins. This even coiunts on your score!

## Secrets

### 91 Pin Strike in Power Bowling Training

To get an automatic 91 pin strike in the last round of Power Bowling, Throw the ball on the right or left rail (depending on if you are right or left handed) so that it stays on it the whole time. If it reaches the end without falling off, you will hear a "click" and an explosion. Then all the pins will fall down from the shockwave. NOTE: This only works on the last round.
